

Properly planning how you pack and store your belongings now, can save you a lot of hassle later on. Here are our top tips on packing a storage space; how to pack, making sure you avoid pitfalls and get the most from your storage room:

Make sure you can easily access your belongings

Categorise your belongings into groups, for example, are there certain items you will need to access or use regularly? If so, store them where you can easily get to them, for example on top of other items and towards the front of the unit.

Keep your fragile items safe

Use boxes to pack your belongings, don't rely on plastic bags. Boxes are stronger and much easier to stack and take up less room. Also, items enclosed in plastic bags can become humid and even attract mildew, causing irreparable damage.

Make sure you pack heavier, sturdier items at the bottom of stacked items. Pack any breakables or precious items in boxes, protected with bubble wrap on top of heavier, more unbreakable items. Some items may not fit in a protective box because of their shape, consider where in the room you can store them.

Get value for money

Make sure you choose the right size of storage room for your needs. You don't want to waste money on a space that is too big. Our team can assist you with the right solution. Consider the packaging you use for your more fragile items. Filling up boxes completely will not only make the most of the space, but it also makes them stronger when stacked, avoiding breakages and damages.
